Ceramic Coating Add-on Services

IGL Coatings Trim (\$50 to \$200, depending on vehicle's aesthetics)

Harsh UV rays and environmental conditions can fade and damage plastics, vinyl surfaces, and other trim components. Application of IGL Coatings Trim rejuvenates these components and provides up to 2 years of protection from the elements to resist fading, cracking, and further damage from occurring.

IGL Coatings Wheel (\$200 or \$50/wheel)

Cleaning your vehicle's wheels can be a hassle. Caustic detergents, road debris, and brake dust can damage the luster and finish on your wheels. To help prevent this damage, IGL Coatings Wheel is a coating that protects your wheels for up to 1 year. Wheels must be removed from the vehicle to be properly prepped and coated.

IGL Coatings Headlight (\$100)

Have you ever seen faded or hazy headlights? UV rays break down modern plastic headlights and cause fading and cracking of the plastics, resulting in diminished headlight visibility. Combat this with IGL Coatings Headlight, a one year coating that prevents these circumstances from occurring.

Glassparency Windshield (\$100)

Heavy rain, snow, sleet, and all sorts of bad weather can cause issues while driving. Glassparency offers a 3 year durability windshield ceramic coating. A Glassparency coated windshield improves clarity, visibility, reduces the need to use your windshield wipers, and helps prevent unsightly water spots from occurring. This application comes with a free shipment of maintenance wipes (recommended to be used every 3 months) to maintain the coating for the 3 year duration.

Glassparency Glass (\$100)

This is an add-on package to the above mentioned Glassparency windshield coating. All remaining windows, to include optional sunroofs, are coated with this ceramic coating to improve clarity, visibility, and help prevent water spotting and etching from occurring.

IGL Coatings Leather (\$200)

Tired of spilling your coffee on your leather seats resulting in unsightly stains? Get your leather coated! With a one year durability, IGL Coatings leather provides hydrophobic resistance to liquids, dirt, and grime. Liquids will literally roll off the surface making cleanup super easy!

IGL Coatings Fabric (\$200)

IGL Coatings offers their Fabric ceramic coating. This turns upholstery into a liquid-shedding menace to spills, grime, and dirt. The result is clean seats, all the time!

Owner's Pride Glass Protection (\$100 windshield, \$200 all glass)

Ceramic coating for your windows and windshield. Increase glass strength by up to 30% and improve clarity in poor weather conditions. Warrantied!

Owner's Pride Interior Coating (\$400 small vehicle, \$500 large vehicle)

Protecting your interior from spills, grime buildup, and dirt. Dirty interior conditions accumulate less over time, and when an accident happens, clean-up is exponentially easier! Warrantied!
